

Figure 1 is a line graph showing the relationship between Coarse Time (y-axis, scaled by $\times 10^6$) and Evt. ID (x-axis). The y-axis ranges from 0 to 70, and the x-axis ranges from 0 to 5000. The graph displays a sawtooth pattern, indicating periodic behavior. The peaks of the sawtooth occur at approximately 67, 67, 67, 67, and 44, while the troughs occur at 0. The x-axis labels are 0, 1000, 2000, 3000, 4000, and 5000. The y-axis label is Coarse Time $\times 10^6$.

Figure 1 is a line graph showing the Coarse Time (Y-axis, scaled by $\times 10^6$) versus Evt_ID (X-axis). The X-axis ranges from 0 to 5000, and the Y-axis ranges from 0 to 70. The graph displays a series of sharp peaks, indicating the coarse time for each event. The peaks occur at approximately Evt_ID 100, 1200, 2200, 2800, 3800, and 4500. The peak values are approximately 65, 65, 65, 32, 65, and 42 respectively.

Figure 1 is a line graph showing Coarse Time (x10⁶) versus Evt_ID. The x-axis (Evt_ID) ranges from 0 to 5000, and the y-axis (Coarse Time) ranges from 0 to 70 (x10⁶). The graph displays a series of peaks representing coarse time values for different event IDs. The peaks occur at Evt_ID values of approximately 200, 1200, 2200, 2800, 3800, and 4500. The peak values are approximately 68, 68, 68, 33, 68, and 44 respectively. The baseline is at 0.

Figure 1 is a line graph showing Coarse Time (x10⁶) versus Evt ID. The x-axis (Evt ID) ranges from 0 to 5000, and the y-axis (Coarse Time) ranges from 0 to 70 x 10⁶. The graph displays a series of sharp, periodic peaks. The peaks occur at approximately Evt ID 500, 1500, 2500, 3500, and 4500. The height of the peaks is approximately 65 x 10⁶. The baseline is at 0. The x-axis ranges from 0 to 5000, and the y-axis ranges from 0 to 70 x 10⁶.

Figure 1 is a line graph showing Course Time (x10⁶) versus Evt ID. The x-axis represents Evt ID from 0 to 5000, and the y-axis represents Course Time (x10⁶) from 0 to 70. The graph shows a sawtooth pattern with peaks at approximately 65, 65, 65, and 65, and troughs at 0. The peaks occur at Evt IDs of approximately 400, 1400, 2400, and 3900.
